Applicant P.A.L.M. MICROLASER TECHNOLOGIES AG		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 5 sheets, including this cover sheet.

This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 5 sheets.

3. This report contains indications relating to the following items:

- I Basis of the report
- II Priority
- III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV Lack of unity of invention
- V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI Certain documents cited
- VII Certain defects in the international application
- VIII Certain observations on the international application

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP2003/013013

I. Basis of the report

1. With regard to the elements of the international application:*

- the international application as originally filed
 the description:

pages _____ 1-21 _____, as originally filed
 pages _____ , filed with the demand

- the claims:

pages _____ , as originally filed
 pages _____ , as amended (together with any statement under Article 19)
 pages _____ , filed with the demand

- the drawings:

pages _____ 1/3-3/3 _____, as originally filed
 pages _____ , filed with the demand

- the sequence listing part of the description:

pages _____ , as originally filed
 pages _____ , filed with the demand

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language _____ which is:

- the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
 the language of publication of the international application (under Rule 48.3(b)).
 the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- contained in the international application in written form.
 filed together with the international application in computer readable form.
 furnished subsequently to this Authority in written form.
 furnished subsequently to this Authority in computer readable form.
 The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
 The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- the description, pages _____
 the claims, Nos. _____ 19-22 _____
 the drawings, sheets/fig _____

5. This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

2. Citations and explanations

Reference is made to the following document:

D1: US-A-5 998 129 (SCHUETZE KARIN ET AL)
7 December 1999 (1999-12-07).

1) Document D1 is considered to be the closest prior art for the subject matter of claim 1. D1 discloses (the references in parentheses are to D1):

a laser micro-dissection system which comprises a microscope for observing a biological material located on an object carrier (column 4, lines 38 to 57), a laser device for releasing a biological object from the biological material by means of laser radiation, and at least one holder which, for use in a laser micro-dissection system, is designed (column 7, lines 45 to 57) to hold a collection apparatus for collecting the biological object released from the biological material for operation with the laser micro-dissection system.

The subject matter of claim 1 differs therefore from the known D1 in that:

the at least one holder comprises a coding which identifies the type of collection apparatus, identification means are provided which identify the collection apparatus held by the holder by evaluating the coding of the holder, and

control means are provided and designed in such a way that, depending on the identified collection apparatus, provide collection apparatus-specific selection functions for allocation of individual biological objects released from the biological material to individual collection vessels of the identified collection apparatus.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The problem addressed by the present invention can therefore be considered that of enabling the identification means to identify the collection apparatus in order to achieve good adjustment of the microscope system.

The solution to this problem as proposed in claim 1 of the present application involves an inventive step (PCT Article 33(3)) for the following reasons:

The automatic identification of the collection apparatus used, in conjunction with the collection apparatus-specific selection functions provided for allocation of the individual biological objects released from the biological material to the collection vessels of the identified collection apparatus, make it possible to avoid operating errors and thus speed up the overall operation.

Claims 2-18 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.
